

Economics - Review Project

You are going to make a PowerPoint presentation that reviews the entire semester. Your presentation will need to be at least 20 slides long. An outline appears below which lists all of the information your PowerPoint needs to include. This will count as a major grade! You will need to complete one unit per day to stay on track. You will email the completed project to kevin.rasco@bisd.net. Your presentation may not use ANY images from my presentations. You may not copy ANY of my text. You must find your own images and write your own text. You will receive four points for each slide of the presentation that contains the proper information. You will receive an extra point for each slide that has a link to information about the content of that slide. The link cannot be my material.

A grading rubric appears at the bottom of the next page. Be sure you have all of the content you need.
